Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 9, 10, 12-14, 16, and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Pat. No. 4,679,834 to Gotanda.

Gotanda '834 teaches Applicant's claim limitations including : a "housing including a strike plate" – 52, a "latch bolt pin actuator mounted for linear movement" – 63, a "spring latch bolt actuator mounted for pivotal movement" – either of 54 or 60 anticipates limitation. While it is recognized that parts 52 and 54,60 do not function differently than the presently-disclosed invention, the intended use does further define any particular structure of the claimed elements in such a way as to patentably distinguish from the prior art which can be used as recited and otherwise teaches the claimed structure. It's further noted that 63 functions to retract 11 and that 54 functions to retract 19.

The law of anticipation requires that a distinction be made between the invention described or taught and the invention claimed. It does not require that the reference "teach" what the subject patent teaches. Assuming that a reference is properly "prior art," it is only necessary that the claims under consideration "read on" something

disclosed in the reference, i.e., all limitations of the claim are found in the reference, or "fully met" by it. *Kalman v. Kimberly-Clark Corp.*, 218 USPQ 789. Claims in a pending application should be given their broadest reasonable interpretation. *In re Pearson*, 181 USPQ 641 (CCPA 1974).

Claim 10 is anticipated by inherent position when ("spring latch bolt actuator") 60 is used to retract 11 via 57,62,63.

As regards claim 12, the reference discloses "motor" – 65.

As regards claims 13,14, the reference discloses an "actuating element" – 64.

As regards claim 16, either of 54,60, are inherently 'adapted to' be filed down to adjust their operability with some latch. It has been held that the recitation that an element is "adapted to" perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re Hutchison*, 69 USPQ 138.

As regards claim 21, broadly-recited step limitations involving broadly-recited elements are anticipated by the written description of function of the device of Gotanda '834.

Allowable Subject Matter

3. Claims 1-8, 17, 19, and 20 are allowed.

Art Unit: 3676

4. Claims 11, 15, and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

5. Applicant's arguments have been considered and are persuasive but are moot in view of the new ground(s) of rejection. Inasmuch as the discovery of additional prior art has resulted in a new grounds of rejection not necessitated by the amendment, this Office action is not made Final.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
